APP LINKING TO MOBILE DEVICE PROCESS (ONCE OFF)

PROFILE

HOME

Once the application is installed, a Splash Screen will appear introducing the user to the Mobile Application. The user will be directed to the app tour (first time only). The app tour will improve user engagement by displaying an in-app guided tour so the user has the knowledge to use the application to its full potential. From the home page the user has the option to navigate to the log in/sign up or contact us page.

LOGIN/SIGN UP

The login/sign up process is for security purposes and will demand the user to either login and link their device to a pre-existing account or sign up with Najm and become a cardholder.

ID Form

Identification information that may be used to verify the user. This will be defined by . This will include the setting of a user pin which will allow user to access the app easily. This we recommend to be a 4 digit numerical pin.

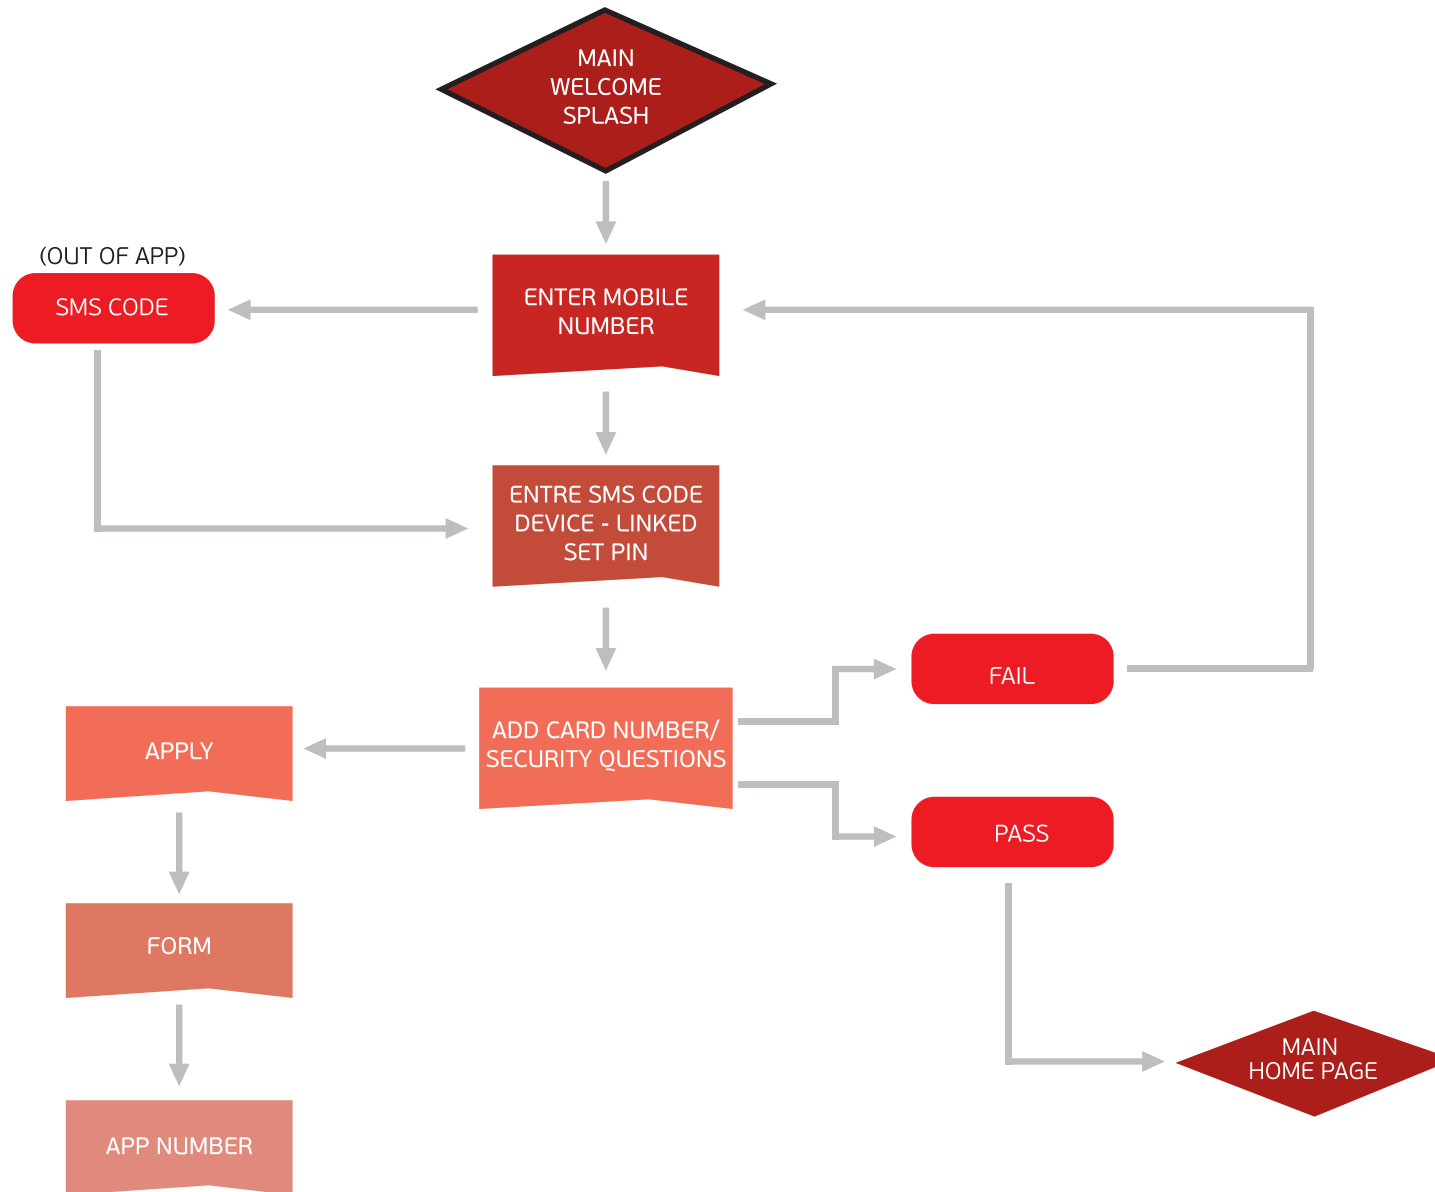

LINK DEVICE

will approve the details provided by the user and register the specific device used to the current users account before linking the device. This is done by entering a valid Mobile Number. An Auto SMS will be sent to this number with a unique pin code which will need to be entered at the next stage of the verification process.

SMS VERIFICATION

The user will receive a SMS confirmation which will need to be entered to link the device to the application. Once the SMS code which is sent is received the same code must be entered to access all account information.

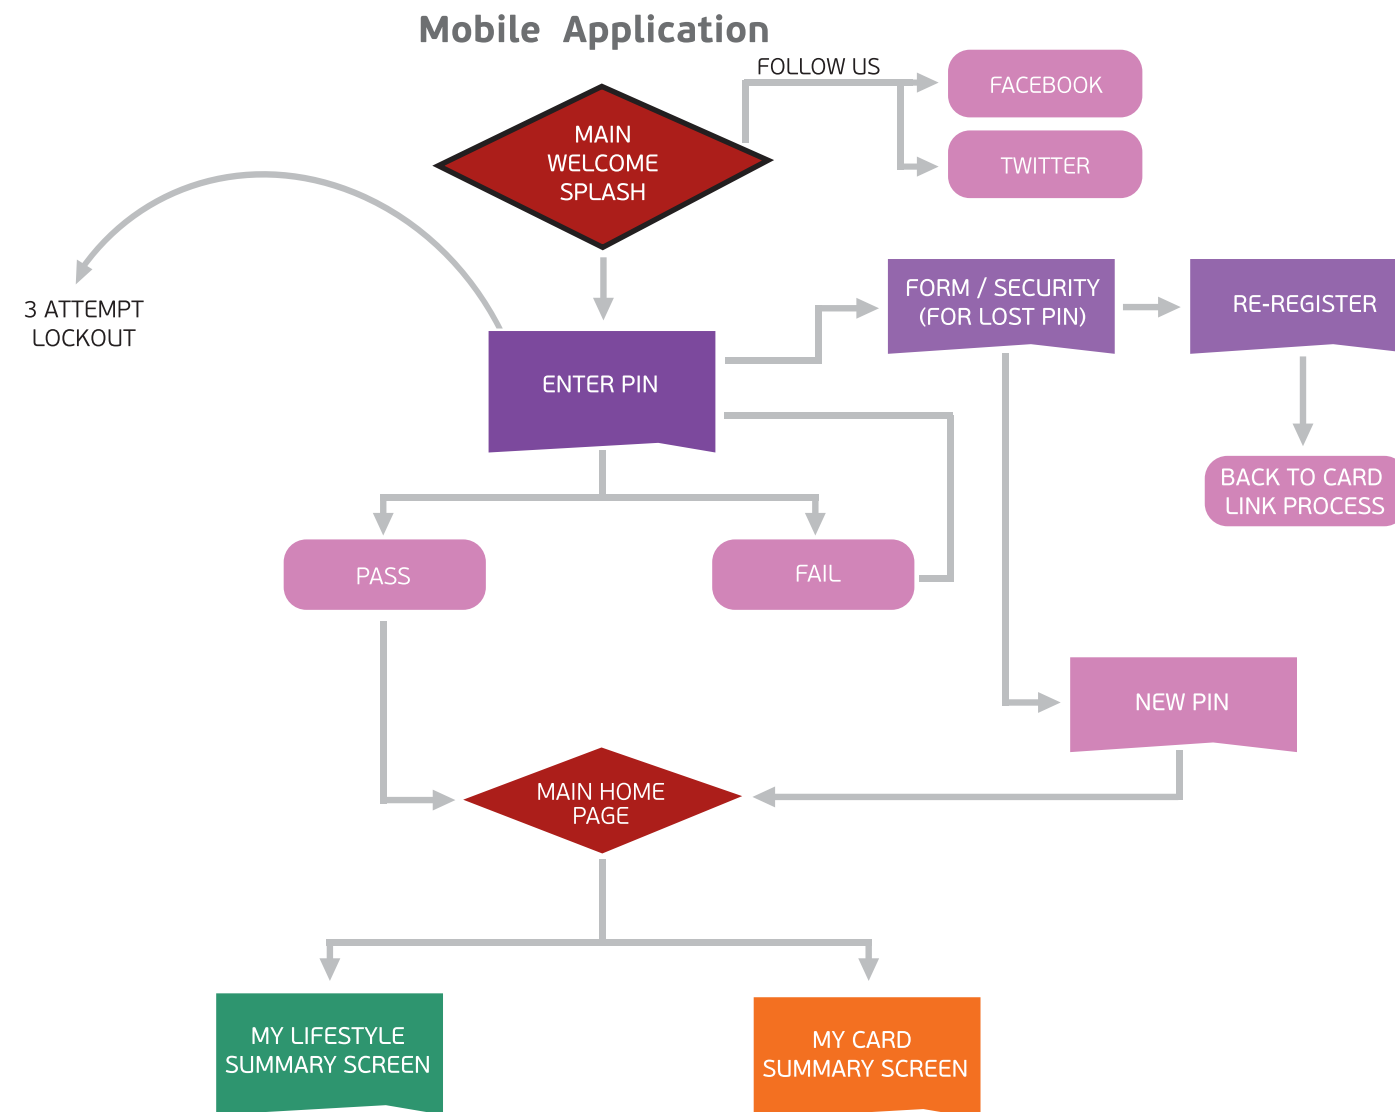

Mobile Application

MODULE - 2

LOGIN PROCESS

LOGIN
Linking the device to the account is a once off procedure. Once linked, the application will request a pin code to access the account and all app functions will be made available to the user. If the user installs the mobile application and does not own a account, the user will have an option to become a account holder and have access to module-5.
